PROFESSIONAL SUMMARY

AI and Machine Learning enthusiast with a strong foundation in Python, Data Analysis, and Software Development. Experienced in building data-driven applications and implementing machine learning workflows using NumPy and Pandas. Background in Electronics and Communication Engineering, with an interest in Edge AI, Computer Vision, and embedded AI systems. Passionate about optimizing ML models and deploying intelligent solutions for real-world applications. Seeking an AI Engineer internship to contribute to computer vision and edge analytics projects.

EDUCATION

Kongunadu College of Engineering and Technology

Trichy, India | 2021 - 2025

Bachelor of Engineering - Electronics and Communication Engineering

PROFESSIONAL EXPERIENCE

MahilMart Shopping Website | www.mahilmart.com

- Designed and developed a scalable full-stack e-commerce web application using Python, Django, and MVC architecture, ensuring clean separation of concerns and maintainable backend code.
- Implemented secure Authentication and Authorization for users and admins using Django auth, including role-based access control, session management, and password encryption.
- Built core e-commerce features such as product catalog, shopping cart, order management, and checkout workflows, efficiently supporting 1000+ products.
- Developed RESTful APIs using Django ORM to perform CRUD operations, handle JSON requests/responses, and integrate frontend with backend services.
- Deployed the application on AWS EC2, ensuring high availability, scalability, and production-ready performance with minimal downtime.
- Integrated AWS S3 for secure storage and retrieval of 1000+ product and media images, improving load performance and achieving 99.9% uptime.

◦ Tech Stack :

- **Backend** : Python, Django.
- **Frontend** : HTML, CSS, JavaScript.
- **Database** : MySQL, MongoDB.
- **Cloud** : AWS (EC2, S3, RDS)

Hotel Booking System

- Designed and developed a full-stack Hotel Booking System using Python and Django, following MVC architecture for scalable and maintainable application design.
- Implemented real-time room availability and reservation management to prevent double bookings and ensure data consistency.

- Developed RESTful APIs using Django ORM to manage reservations, customer profiles, and availability updates with JSON-based data exchange.
- Integrated PostgreSQL for efficient relational data management, optimized queries, and reliable transactional booking operations.
 - **Tech Stack:**
 - **Backend** : Python, Django.
 - **Frontend** : HTML, CSS, JavaScript.
 - **Database** : PostgreSQL

Heart Disease Prediction System

- Developed a machine learning model to predict heart disease using the Statlog dataset, performing data preprocessing, EDA, and feature scaling.
- Implemented and compared multiple algorithms including Logistic Regression, KNN, Decision Tree, and Random Forest using accuracy, precision, recall, and confusion matrix.
- Achieved 75–85% accuracy and analyzed feature importance to identify key factors influencing heart disease prediction
 - **Tech Stack:**
 - **Backend** : Python.
 - **Data Analysis & Visualization** : Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn.

TECHNICAL SKILLS

- **Programming & Back-End Development:** Python, Django, RESTful APIs, ORM, Authentication & Authorization
- **Data Analysis:** NumPy, Pandas, Scikit-Learn.
- **Machine Learning:** Supervised Learning (Linear Regression, Logistic Regression, KNN, Decision Tree, Random Forest), Model Evaluation, Data Preprocessing.
- **Data Analysis & Visualization** : NumPy, Pandas, Power BI, Matplotlib, Seaborn.
- **Front-End Development:** HTML, CSS, Javascript.
- **Database Management:** MySQL, PostgreSQL, MongoDB.
- **Operating Systems** : Linux (basic familiarity)
- **Version Control** : Git & GitHub.
- **AWS Cloud Platforms:** S3 Bucket, EC2, RDS.
- **Tools Used** : Pycharm, Vs Code, Jupiter Notebook, Dbeaver, PgAdmin.
